

Figure 1

Flufenazine effects on spinal cord neurons survival.

Figure 2

Protective effects on cortical neurons of flufenazine after glutamate intoxication and with maturation with BDNF.

Figure 3

Protective effects of flufenazine on mesencephalic neurons after MPP+ intoxication.

** significant from control ($p < 0.01$)
**** significant from control ($p < 0.001$)
**** significant ($p < 0.001$)

Figure 4

Neurotrophic effects of flufenazine on cortical neurons.

**** significant from control ($p < 0.001$)

Figure 5

Neurotrophic effects of flufenazine on spinal cord neurons.

Figure 6

Survival rate of SOD mice after oral administration of flufenazine.
